LOST—Bunch of keys. Finder please call 148 and receive reward. A-5

### ENGLAND PLANS TO OWN POWER SYSTEM

LONDON, April 3.—Plans for a vast extension of the use of electricity in Great Britain are being made.

The division of the country in 10 areas with a huge power station in each will do away with the smaller competitive projects and cheaper production to a point where current can be used for heating and cooking and the operation of all household devices as well as for lighting.

Current is to be supplied to farmers as well as to urban centers and the increased use will still further lessen the proportionate cost of production.

## Mining and Financial News

BY REVIEW LEASED WIRE

NEW YORK, April 3.—Eliminating the familiar methods of acceleration employed by pools and associated professional interests, trading in stocks today was featureless, the demand for high grade shares showing also steady diminution.

Conservative interests were again restrained by the confusing character of Paris advices and the refusal of Director General Hines of the railroad administration to accept the schedule of steel prices fixed by the industrial board.

United States Steel was forced down to 97 1/2 and with other industrial, shipping, oils and specialties registered extreme reversals of two to four points, the market finishing with a heavy undertone.

Metals were among the few exceptions to the reactionary trend. Sales amounted to \$25,000 shares.

Sound investment conditions were indicated by the keen inquiry for war finance bonds, but this demand found no reflection in the general market for high class securities.

Liberty bonds were firmer, foreign issues continued to ease and changes in domestic rails and industrials were narrow. Total sales, par value, aggregated \$14,750,000. Old United States coupon 4 1/2 rose 3/4 per cent on sales; others unchanged on call.

### COTTON MARKET

NEW YORK, April 3.—Cotton closed steady with new style months 15 to 50 and old style months 5 to 36 points net higher.

### METAL MARKET

NEW YORK, April 3.—Lead firm; spot and May \$5.20@5.25. Spelter, firm; spot East St. Louis delivery, \$1.55@1.60; May, \$6.20@6.40. Copper, quiet, electrolytic, 15 1/2@15 3/4.

### GRAIN MARKET

CHICAGO, April 3.—Much nervousness developed in the corn market today regarding action of exchange of officials in asking members for a statement of open trades in May corn exceeding 25,000 bushels. Dips and bulges followed in rapid succession. The market closed unsettled, 1 1/4 net lower to 1 1/2 advance, with May \$1.55 1/2 to \$1.55 3/4 and July \$1.45 1/2 to \$1.45 3/4. Oats finished 5/8 to 1 1/2 down, and provisions varying from 25c off to 70c advance.

Owing to the irregularity which characterized the numerous price changes in the corn market it looked as though many traders were trying to thin up all outstanding deals and thus get away from the necessity of a statement.

Big stocks gave an advantage to the bears in oats.

Advanced quotations on hogs made the provision market average higher despite packers' selling. Strength was chiefly in rib and pork.

### KORR GIVES "INSIDE" OF WOODMAN BRIBERY

LOS ANGELES, April 3.—Thomas Woodman, district attorney of Los Angeles county, issued a statement today announcing that Horace W. Karr made a complete statement throwing light on the charges of police graft that have been the subject of a grand jury investigation here. Karr was formerly a city hall reporter and was reported to be the go-between for Mayor Woodman, recently indicted, and those with whom he is alleged to have dealt.

The indictment alleged that Karr had collected for the mayor \$2500 from negroes who were granted immunity from arrest for violations of ordinances forbidding gambling and other offenses.

### RUSSIAN SOLDIERS HOME FROM GERMANY

OMSK, April 3.—More than 200,000 prisoners have returned from Germany in the past six weeks, and the Omsk government has been taxed to care for them.

Registration stations have been operated at Tiumen and Kurgan and then men have been given baths and clothing before being sent forward to their homes, though the problem of clothing has been a difficult one. Most of the homeward journey has been made on foot, with an occasional lift by some peasant's cart or now and then a ride on a train.

### TURNED DOWN TANK; NOW GLAD TO GET IT

LONDON, April 3.—Winchester City council has reversed its decision not to accept a tank offered by the British war office. The refusal of the war office to create such a protest that the council lost no time in meeting and voting to accept the trophy "with thanks" and a site is being sought.

## OPERATION OF SPRUCE DIVISION EXPLAINED IN GENERAL'S REPORT

### Lumber Produced Cheaply and in Great Quantity to Allied Powers

PORTLAND, Ore., April 2.—A statement covering operations and costs of the spruce production division was made public today by General Brice P. Disque, just prior to his relinquishment of the division and resigning as president of the Spruce Production corporation. General Disque tells in detail of the development and organization of the division which was to increase the monthly production of material from 3,000,000 to 10,000,000 feet at once. The principal reasons for forming the corporation, as given by General Disque, were:

First—About 65 per cent of the production of aircraft lumber was allocated to Great Britain, France and Italy and it seemed doubly equitable that they should bear that part of the expense necessary to build the mills and railroads required.

Second—We were actually carrying on a great industrial enterprise and required the freedom of action usually found in a business concern and almost impossible under war department regulations.

We provided in this way for our allies to assist in the capital expenditures before they were made rather than doing it after development, through paying for lumber, the sales price of which included amortization of capital expenditures on a basis of complete amortization in ten months after completion.

Because of the importance of the lumber industry in the Pacific Northwest there has been a great volume of discussion regarding the operations and costs of this organization. Most of it has come from people totally ignorant of our problems, methods, or other facts.

It is appropriate, therefore, to refer to the quantity of production and cost of same in this summary. The accountants of this organization have had instructions from the beginning to include in their cost accounting, every legitimate item and that meant rent, stationery, telephone, officers' and soldiers' pay and subsistence, as well as transportation and purchase of all stumps, materials, equipment and rights of way and hire of labor.

The entire expenditures of the Signal Corps, U. S. Army, Spruce Production Division and the U. S. Spruce Production corporation, from the beginning of operations to, and including, April 1, will not exceed \$45,000,000. The total footage of aircraft lumber produced, shipped and paid for by the Signal Corps, Spruce Production division and U. S. Spruce Production corporation was 143,000,000 feet.

Therefore, if we assume that the corporation has no assets whatever, the 143,000,000 feet of aircraft lumber cost \$318 per M. and such a price contemplates a complete amortization of every capital expenditure and expense item involved in our operations.

However the corporation has on hand today tangible and salable assets, which, estimated at approximately 40 per cent of their cost, are worth \$8,000,000. Deducting this \$8,000,000 from the total expenditure of 45,000,000 we have an expenditure of \$37,

500,000 for the 143,000,000 feet, at a resulting cost per thousand of \$262. To date the corporation has sold approximately \$2,000,000 of these assets and has averaged near 80 per cent of their cost price. Therefore, it would appear that my estimate of \$8,000,000 worth of assets which is approximately 40 per cent of the cost price, would be very conservative.

In all of our operations it has been provided that the Allied governments shall participate in the dead loss which will finally result due to depreciation in value of assets, in proportion to the amount of aircraft lumber supplied to them. Based on my estimate of and salvage of 40 per cent of the cost value of our assets, there will be a dead loss of \$12,000,000, due to the operations of the Signal Corps, Spruce Production Division and the United States Spruce Production corporation, and this loss will be distributed:

Thirty-four per cent of \$4,100,000 to the United States.  
Thirty-one per cent, or \$3,800,000, to Great Britain.  
Twenty-four per cent, or \$2,900,000, to France.  
Ten per cent, or \$1,200,000, to Italy.  
Of course, this loss must be considered in connection with the fact that America and her Allies actually paid an average price of \$150 per thousand feet for all the lumber that they received and will pay no more.

## TELEPHONE RATE CASE REACHES HIGH COURT

WASHINGTON, April 3.—Petitions were filed in the supreme court today asking review of Massachusetts court decisions dismissing proceedings brought by the estate public service commission to compel the New England Telephone and Telegraph company to cancel toll rate ordered by Postmaster General Bur
